*Research Themes: **MCMC** · **Nested Sampling** · **GPU-Accelerated Inference** · **Generative AI for Science***

Profile

Postdoctoral researcher in probabilistic machine learning and scientific inference, specialising in GPU-accelerated Bayesian computation and generative surrogate modelling for physical simulations. Lead developer and contributor of open-source JAX scientific software tooling, with experience translating research methods into robust, reusable software and collaborating across academia and industry.

Key skills

Statistical/Generative AI: Bayesian inference; simulation-based inference; uncertainty quantification; surrogate modelling; diffusion / flow-matching models;

Software: Python; JAX; torch; HPC; GPU; C++; version control (Git); CI/testing; packaging; documentation

Research: Method development; benchmarking; reproducible workflows; scientific computing for cosmology/GW/HEP

Collaboration: Cross-disciplinary research; industry-facing delivery; mentoring and supervision;

Appointments

Kavli Institute for Cosmology, University of Cambridge
Postdoctoral Research Associate   *2021-*
Member of the Handley-lab research group:
○ Developing GPU-accelerated inference for next-generation cosmology, gravitational wave, and particle physics experiments.
○ Building simulation-based inference and advanced MCMC tools in JAX/BlackJAX.
○ Bayesian statistics for scientific inference problems.

Corpus Christi College, University of Cambridge
Research Associate   *2022-*

Polychord Ltd.
Research Scientist   *2021-*
Cambridge spin-out applying Bayesian methods to industrial problems including:
○ Molecular structure prediction, battery design optimization, sensor placement.

Education

UCL
PhD. Particle Physics   *2015–2019*
Thesis titled, *"Constraining new physics with fiducial LHC measurements."* supervised by Prof J. Butterworth. Recipient of UCL HEP postgraduate prize.

Durham University
MSc Particles, Strings and Cosmology   *2014–2015*

Durham University
MSci Natural Sciences, Maths and Physics   *2009–2013*

Grants

Google Cloud for Researchers
$5k Google Compute Engine GPU credits. *2025*

Kavli Foundation
£3k to host Cosmological inference in High dimension workshop. *2024*

Corpus Christi College, University of Cambridge
College Research Associateship. *2023*

Marie Curie Early Career Researcher
£30k for academic secondment and travel grant. *2016-2019*

Teaching

University of Cambridge **Institute of Astronomy (Maths)**
Part II Statistical Physics *2025*
4 groups of 2 students, ~ 40 hours

University of Cambridge **Natural sciences tripos (Physics)**
Part II Relativity *2022*
4 groups of 3 students, ~ 40 hours

University of Cambridge **Natural sciences tripos (Physics)**
Part III Projects *2021-*
Primary Supervisor for 5 MSc projects, ~ 20 hours contact each

Recent Conferences and Invited Talks (2024-)

NeurIPS - FPI Workshop
San Diego *2025*
Particle Monte Carlo methods for Lattice Field Theory

CamGW: Cambridge Gravitational Wave network
KICC, University of Cambridge *2025*
Towards real time Gravitational Wave inference

Future of SED Fitting
KICC, University of Cambridge *2025*
GPU Accelerated Sampling methods

ICLR - FPI Workshop
Singapore *2025*
Nested Slice Sampling

Gravitational Wave Analysis in the Era of Machine Learning
Royal Astronomical Society *2025*
GPU Accelerated Sampling methods

BayesAI Workshop
Lancaster University *2024*
Neural network advances in Nested Sampling

EU AI for Fundamental Physics Conference
Amsterdam *2024*
Diffusion Meets Nested Sampling

Cavendish Astrophysics Seminar
University of Cambridge *2024*
Diffusion Models for accelerated inference.

Astrophysics ML Seminar
